(a) Variable Renaming

Original

```
int calculateSum(int
      [] numbers) {
    int total = 0;
    for (int num :
       numbers) {
        total += num;
    }
    return total;
}
```

Obfuscated

```
int lIii(int[] Iiii)
      {
    int liii = 0;
    for (int iIIi :
       Iiii) {
        liii += iIIi;
    }
    return liii;
}
```

(b) Dead Code Insertion

Original

```
int getMax(int a, int
      b) {
    if (a > b) {
        return a;
    }
    return b;
}
```

Obfuscated

```
int getMax(int a, int b)
      {
    if (false) {
        System.out.
          println("dead");}
    if (a > b) {
        return a;}
    return b;
}
```

(c) Literal Encryption

Original

```
void greet() {
    String msg = "
      Hello!";
    System.out.
      println(msg);
}
```

Obfuscated

```
void greet() {
    String msg =
      decrypt("Xy9K
      ...");
    System.out.
      println(msg);
}
```
